SOLAR PRODUCTS & SOURCING

Solar sourcing. Clearer decisions.

Our aim: a suitable product scope, a clear quotation and the information you need before ordering.

UNIFIED SOCIAL CREDIT CODE 91130602MAKNUQ4L6G

Company facts come from the business licence. Confirm the manufacturing site, available documents and order-specific services for your selected product.

Check company details

Make the decision clearer.

Our aim is to help you choose a suitable specification, understand the full quotation and resolve questions that can delay an order.

01

Compare on the same basis

Match specification, quantity and delivery basis. Identify included, excluded and unconfirmed costs.

02

Check the evidence

Agree available photos, samples, documents and any checks, including scope, cost and responsibility.

03

Keep the agreement clear

Record the specification, packing, payment, delivery and issue-handling arrangements before ordering.

Read the buying guide

Generation & power conversion.

Start with the module format and the electrical context of your project.

Product visualization

01 / PRODUCT FAMILY

PV modules

Explore module sourcing around your preferred format, project capacity and destination.

What to share

- Module type and dimensions
- Target capacity and quantity
- Installation country

View this product family

Product visualization

02 / PRODUCT FAMILY

Inverters

Define the application, grid conditions and equipment scope for your enquiry.

What to share

- Application and system context
- Grid type / voltage, if specified
- Equipment or model requirements

View this product family

Model-specific specifications and documentation are confirmed for proposed items.

Structures & system components.

Bring the site conditions and component list into the sourcing conversation.

Product visualization

03 / PRODUCT FAMILY

Mounting systems

Discuss rails, clamps and related structures around the installation surface and module format.

What to share

- Roof or ground application
- Module dimensions / frame details
- Site and structural requirements

View this product family

04 / PRODUCT FAMILY

System components

Organise cables, connectors and accessories through a clear bill of materials.

What to share

- Component name and quantity
- Required ratings / specifications
- Equipment compatibility

View this product family

Share your project specifications. Exact types and compatibility require confirmation.

Start with the application.

Tell us where the products will be used and which stage your procurement has reached. Include the details your project team already has.

Industry example, not a JADMORA project. Photo credit: see page 6.

01 **Residential**

Installation country, roof or other installation area, and any known grid or equipment requirements.

02 **Commercial & industrial**

Target project capacity, delivery destination and a bill of materials, if available.

03 **Ground-mounted**

Project location, module dimensions, mounting scope and the documents required for review.

Already have a specification sheet or component list?

Email your files with your enquiry

Compare the details. Then decide.

Send the product, quantity and destination. If some details are undecided, tell us the application and the questions you need help clarifying.

YOUR SOLAR BRIEF

Product or model, quantity, ratings and compatibility, project context, installation country and delivery location.

Agree these points before ordering.

Cost basis	Unit and total price, currency, packing, freight, delivery basis and excluded costs.
Evidence	Available photos and documents; requested samples or checks, their scope, cost and responsibility.
Written terms	Final specification, quantity, payment, timing and issue-handling arrangements.

Buying & order checklist

A question about an order?

Send the order reference, affected quantity and clear photos, and tell us the outcome you need. Discuss the evidence and next steps against the agreed order terms.

An enquiry starts a discussion. It does not place an order.
