Company facts come from the business licence. Confirm the manufacturing site, available documents and order-specific services for your selected product.

Check company details

Make the decision clearer.

Our aim is to help you choose a suitable specification, understand the full quotation and resolve questions that can delay an order.

01

Compare on the same basis

Match specification, quantity and delivery basis. Identify included, excluded and unconfirmed costs.

02

Check the evidence

Agree available photos, samples, documents and any checks, including scope, cost and responsibility.

03

Keep the agreement clear

Record the specification, packing, payment, delivery and issue-handling arrangements before ordering.

Read the buying guide

01 / YARN FAMILY

Cotton yarn

Start with your fabric, then define the yarn.

Product visualization.

Cotton, in your specification.

Discuss cotton yarn for your knitting or weaving brief. The required composition, yarn construction and finish form the starting point for a quotation.

Tell us about the fabric

Share the intended fabric, desired hand feel and processing needs. A current yarn specification or fabric reference can help define the discussion.

WHAT TO INCLUDE IN YOUR ENQUIRY

Fibre composition	Required cotton content and any permitted blend.
Yarn count & ply	State the count system, numerical count and number of plies.
Spinning & twist	Share your spinning preference and twist requirements, if specified.
Finish & colour	Greige or dyed requirements, finish and a shade reference.

02 / YARN FAMILY

Polyester yarn

Define the form. Match the application.

Product visualization.

Begin with the yarn form.

Tell us whether your brief calls for spun or filament yarn. Add the count or linear density, construction and appearance required for your textile project.

Make the requirement clear

State any material preference and supporting-document needs. The illustration shows a yarn-family concept; it does not define a supplied yarn.

WHAT TO INCLUDE IN YOUR ENQUIRY

Yarn form	Spun or filament, with any required construction details.
Count or linear density	State the value and unit: Ne, Nm, tex, dtex, denier or your own specification.
Finish & appearance	Lustre, colour, finish and end-use requirements.
Material & evidence	Virgin or recycled preference, if relevant, and required documents or tests.

03 / YARN FAMILY

Blended yarn

Your fibre balance. Your fabric brief.

Product visualization.

Define the fibre balance.

Build your blended yarn enquiry around the fabric you want to make. Name the fibres and target percentages, then define the yarn count and construction.

Connect blend to end use

Describe your target hand feel, processing needs and finish. Requested fibre ratios are requirements for review, not confirmed catalogue specifications.

WHAT TO INCLUDE IN YOUR ENQUIRY

Fibre blend	List every fibre with its target percentage.
Yarn construction	Count system and value, spinning preference, twist and ply.
Fabric requirements	Knitting, weaving or another end use, with processing needs.
Reference & finish	Colour or fabric reference, finish and testing criteria.

View blended yarn online

Compare the details. Then decide.

Send the product, quantity and destination. If some details are undecided, tell us the application and the questions you need help clarifying.

YOUR YARN BRIEF

Fibre composition, count and units, construction, end use and finish; quantity, destination and target schedule.

Agree these points before ordering.

Cost basis	Unit and total price, currency, packing, freight, delivery basis and excluded costs.
Evidence	Available photos and documents; requested samples or checks, their scope, cost and responsibility.
Written terms	Final specification, quantity, payment, timing and issue-handling arrangements.

Buying & order checklist

A question about an order?

Send the order reference, affected quantity and clear photos, and tell us the outcome you need. Discuss the evidence and next steps against the agreed order terms.

An enquiry starts a discussion. It does not place an order.

Product images are AI-generated visualizations. Confirm actual composition, construction and suitability for the proposed item.
